

EDUCATION

Bachelor of Technology (B.Tech), Mechanical Engineering

VIT Vellore

2019 - 2023

CGPA: 8.43/10

INTERNSHIPS

Front End Development

Internshala, Virtual

Jul 2020 - Aug 2020

It was the development of a corporate website for an organization.

POSITIONS OF RESPONSIBILITY

I have built various websites, which were responsive, good looking and very informative. I am actively working in order to provide great websites to my university, and also for learning purpose.

TRAININGS

Web Application Development

udemy, Online

May 2019 - Jul 2019

PROJECTS

corporate website for an organization.

Jul 2020 - Aug 2020

<https://www.intrius.com>

Restaurants startup website.

Jun 2020 - Jul 2020

<https://abhinav-37.github.io/restaurantswebsite/>

It is a website in order to showcase a potential restaurant startup/business. It's very good looking and functional too since it is backed firebase backend. All the animations are also very smooth.

Newsletter website.

Jul 2020 - Jul 2020

<https://abhinav-37.github.io/newsletterwebsite/>

It is a single page and extremely good looking newsletter website. It's very functional too since it consists of firebase as a backend. This webpage has got all the bells and whistles of modern javascript technologies.

front end of a potential startup.

Mar 2020 - Mar 2020

<https://abhinav-37.github.io/project-3-tindog-startup/>

this project was about building beautiful frontend of the website which i am going to upload in the project link.

Coming soon web page.

Jan 2020 - Jan 2020

<https://abhinav-37.github.io/project2-coming-soon-page/>

This is a coming soon webpage. For an imaginary store.

hackethon website

Oct 2019 - Dec 2019

<https://abhinav-37.github.io/access-denied/>

This is a highly informative and good looking website. This website is attached with firebase backend so it's very responsive to.

A fullstack website for croudfunding application.

Sep 2020 - Present

<https://crowdfund.securosoft.com/>

Its a website made individually by me for a crowdfunding application. its made with the latest technologies like node and express.
